SKILLS

- HTML
- CSS
- Scss
- Bootstrap
- Tailwind
- javascript
- JQuery
- React Js

EXPERIENCE

- Actually, I haven't worked yet but I have made a lot of projects that gained me a very good experience in those skills that I have mentioned in the previous section I am not saying that I'm an expert, but I'm pretty good with them.
- Let's start with HTML, I use the popular tags and I'm familiar with semantic HTML and its benefits for the SEO and user experience
- And for CSS I'm pretty much good with it I can do fully responsive designs with cool animations
- For javascript I have done a lot of things with it, I'm good with ES5 and ES6 features, manipulating the DOM, Async js and also I'm good with APIs
- For JQuery I haven't done a lot with it, only small projects but I am familiar with its syntax and I can work with it or edit websites built with JQuery
- For React I have enrolled in an Udemy [course](#) for Traversy Media and I learned in this course react basics, jsx, hooks such as useState, useEffect, useContext, useReducer, uesRef, and creating custom hooks also I've learned to use react-router-dom features

EDUCATION

- I am studying Mechatronics Engineering at Aleppo's university I'm in my third year
